GITHUB

github.com/buzzdotsui

PORTFOLIO

testimonyowolabi.pages.dev

TECHNICAL SKILLS

LANGUAGES

TypeScript, JavaScript, Python

FRONTEND

React, Next.js, HTML, CSS, Tailwind CSS

BACKEND

Node.js, REST APIs, server-side application development

DATABASES

PostgreSQL, Supabase, Prisma, Redis / Upstash

AUTH & SECURITY

Better Auth, RBAC, authentication & authorization

INFRASTRUCTURE

Docker, Git, GitHub, Vercel, Cloudinary

AI / EMERGING

AI-assisted development workflows, Model Context Protocol (MCP)

WEB3

Sui, Move, Solidity

EDUCATION

Federal University of Technology, Akure (FUTA)

B.Eng. Metallurgical & Materials Engineering
Expected 2028

LEADERSHIP

Community Lead, Sui On Campus — FUTA

Leading student engagement around Sui/Move ecosystem development.

Student General PRO

School of Engineering and Engineering Technology (SEET), FUTA.

TESTIMONY OWOLABI

FULL-STACK SOFTWARE ENGINEER

SUMMARY

Full-stack software engineer building production-oriented web applications with TypeScript, React, Next.js, Node.js, and PostgreSQL. Independently built and shipped multiple client web applications end-to-end, including a multi-role healthcare management system covering authentication, role-based access control, and database architecture with Prisma. Comfortable owning a project from initial build to production, with supporting experience in Web3 development on Sui and Move, and applied use of AI tooling and the Model Context Protocol (MCP) in the development workflow.

EXPERIENCE

Juphil Aluminum

2025 - Delivered

juphilaluminum.com · Next.js, React, TypeScript, Resend, Vercel

- Designed and built a responsive business website end-to-end, from initial architecture through production deployment on the client's live domain.
- Implemented a contact workflow with email delivery (Resend) and configured SEO/metadata and domain setup for production launch.
- Owned the full engineering lifecycle independently — frontend architecture, responsive UI, and deployment — translating client requirements into a working product.

Accurate Medical Center

2025 - 2026

accurate-medical.vercel.app · Next.js, TypeScript, Prisma, PostgreSQL/Supabase, Better Auth, Redis, Cloudinary, Docker

- Built a full-stack hospital management system end-to-end, including database schema design (Prisma/PostgreSQL) and application architecture for a multi-role healthcare workflow.
- Implemented authentication and role-based access control (RBAC) with Better Auth to separate staff, admin, and patient-facing workflows.
- Integrated Redis/Upstash for caching and Cloudinary for media handling, and containerized the application with Docker for deployment.

SELECTED PROJECTS

ReubX World

reubx.vercel.app

- Designed and deployed a live web application, demonstrating independent end-to-end development and production deployment.

Gilgal Dental Clinics

gilgal-dental.vercel.app · Next.js, TypeScript

- Built and deployed a responsive, mobile-first dental clinic website, including an appointment-oriented UI structured around real business requirements.

CERTIFICATIONS

Anthropic — Claude Academy · Sept. 2026

- Introduction to Model Context Protocol
- Model Context Protocol: Advanced Topics
- AI Capabilities and Limitations
- AI Fluency for Builders
- AI Fluency for Students
- AI Fluency: Framework and Foundations

Professional Certifications

- IBM Full Stack Software Developer Professional Certificate — IBM
- freeCodeCamp Full Stack Developer Certification — freeCodeCamp
- Oracle Certified Professional: Java SE Developer — Oracle
