EDUCATION

Federal University of Technology, Akure (FUTA)

B.Eng. Metallurgical & Materials Engineering • Expected Graduation 2028/2029 • 200 Level
Department of Metallurgical & Materials Engineering (MME), School of Infrastructure, Minerals and Manufacturing Engineering (SIMME)

LEADERSHIP & COMMUNITY EXPERIENCE

Community Lead Sui On Campus — FUTA	Current
- Built and grew a campus technology community to approximately 1,500+ students and members, establishing it as a leading Web3 and emerging-technology hub at FUTA. - Organized approximately 3 major events and facilitated approximately 5 technical workshops introducing students to blockchain, Web3 development, and practical technology opportunities. - Developed multiple partnerships and collaborations to expand community reach and ecosystem awareness. - Recognized by the Sui Foundation for outstanding community-building efforts. - Led community engagement, education, and advocacy initiatives that brought emerging technology to a large student audience.	
SIMME Vice President-Elect NUESA FUTA	2026/2027
Elected Vice President of NUESA FUTA to represent and advocate for students of the School of Infrastructure, Minerals and Manufacturing Engineering (SIMME).	
Class PRO Engineering Class 28	Current
Serves as the primary communication link between classmates, coordinating information and engagement across the class.	
Student General PRO SEET '28	Current
Coordinates public communication and engagement for the SEET '28 student group.	
Volunteer / Member FESSU FUTA Chapter	Current

TECHNICAL EXPERIENCE & SKILLS

Full-Stack Development: Next.js, React, TypeScript, JavaScript, Tailwind CSS, Prisma, PostgreSQL — frontend, backend, APIs, authentication, and database-backed web applications
Web3: Sui blockchain, Move, smart contracts
Security & Infrastructure: Cybersecurity, penetration testing, DevSecOps, cloud and DevOps fundamentals
AI & Generative AI: Applies generative AI (including Claude) throughout the development workflow — coding, debugging, research, and technical problem-solving

SELECTED PROJECTS

Hospital Management System Accurate Medical Center — Full-Stack Developer
- Built a full-stack hospital management system spanning patient registration, appointments, doctor and nursing workflows, billing, pharmacy, laboratory, and a role-based admin dashboard with audit functionality. - Stack: Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Better Auth, Cloudinary.
Website Development Juphil Aluminum Limited — Client Project. Designed and developed a website and digital presence for the client.
Metabotics Interdisciplinary Technology Initiative. Exploring the use of software and technology to accelerate metallurgical and materials engineering research and support the development of future materials.
Testy Tech Inc. Technology Initiative. Building digital solutions and exploring emerging technologies.

AI EXPERIENCE & CERTIFICATIONS

Uses Claude extensively — over 1 year of hands-on experience — for software development, generative AI workflows, academic learning, research, and technical problem-solving. Participated in AI hackathons.
Claude Education — AI Fluency Certifications (3).
